- Components
- Sub-Assemblies
- Partnership manufacturing

# Your **total mechanical supplier** and **partner**

TaMek a.s is an advanced mechanical company established in 1984 when Tandberg mechanical workshop was separated from Tandberg Radio Factory. During more than thirty years of existing as an independent company, we have grown to become a knowledge-based partner that delivers complete mechanical systems to defence, marine, aerospace, railroad, electronics industries and more.

## Reasons to choose TaMek:

- Renowned customer references
- Modern production equipment
- Complete mechanical partner
- Customized and innovative processes

## TaMek is recognized by:

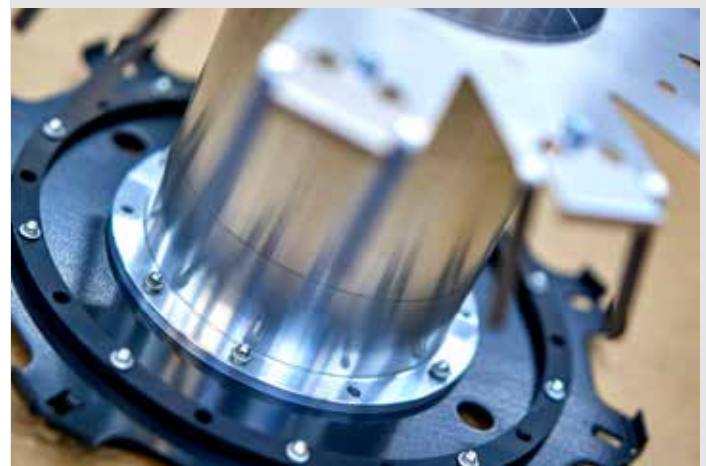

- Technical expertise
- Quality
- Flexibility
- Delivery / Accuracy

## Different levels of supply:

- Components
- Sub-Assemblies
- Partnership manufacturing

## Services:

- Sheet metal
- Machining
- Welding
- Surface treatment
- Assembly
- Marking / engraving
- Test and control

# Quality

TaMek a.s has a modern machine park equipped with both modern production machines and production systems, for varied and demanding tasks. TaMek has a continuing modernization process to increase our competitiveness. This allows us to deliver products and services to a large variety of customers, including defence related customers with very high-quality requirements.

Our employees have a certificate of competence in their respective fields, and we are an approved company for educating apprentices. By this we are contributing to secure future resources within the field.

We are ISO 9001 certified and are very thorough in documenting everything we do to have records and traceability of all our processes.

Partly due to this, TaMek has received the status as a "Selected Partner" for BAE Sytems Hägglunds

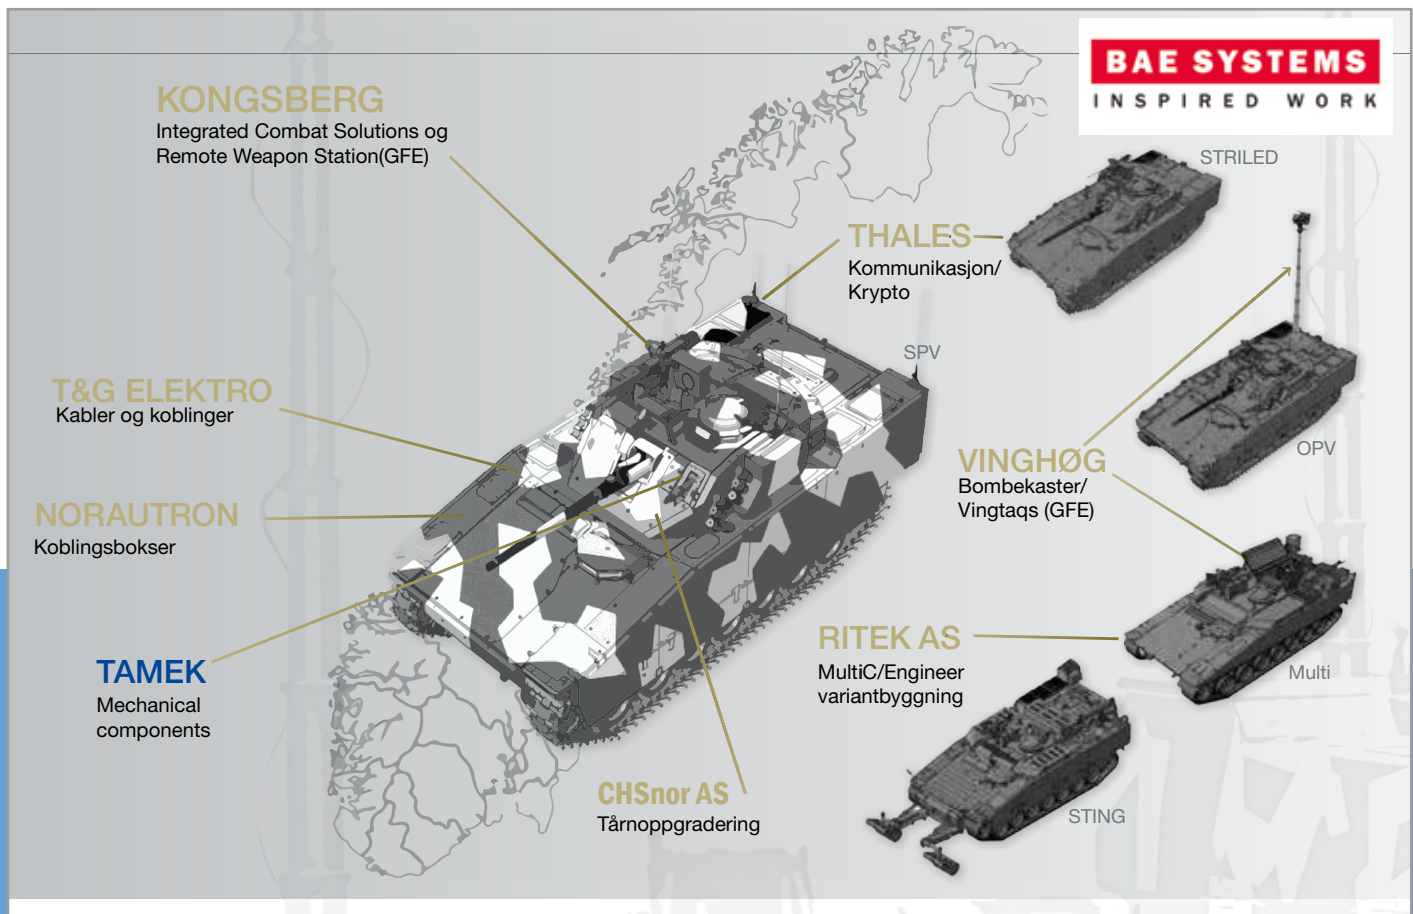

## Customer references

- Kongsberg Gruppen
- BAE Systems Hägglunds
- And several others

## Certifications and MPS

- ISO 9001
- Pro-M (with full traceability)
